

## Empowering Education through Academic Bank of Credits (ABC)

In the innovative landscape of education following NEP-2020, let's imagine a university named Progressive University (PU) implementing the Academic Bank of Credits (ABC) to enhance flexibility and promote lifelong learning.

To be a part of the Academic Bank of Credits, students follow a simple procedure for creating their APAAR (Automated Permanent Academic Account)/ABC ID. Let's take a quick look at it.

### Step 1: Login to DigiLocker

Students with a DigiLocker account can seamlessly create their APAAR/ABC ID. DigiLocker serves as a secure platform for managing academic documents and now facilitates the integration with the Academic Bank of Credits.

### Step 2: Search for Education

Within the DigiLocker platform, students navigate to the Education category. This streamlined process ensures that students can easily locate and access the ABC service.

### Step 3: Create APAAR/ABC ID

Once in the Education category, students select their university from the available options and click on "Generate APAAR/ABC ID." This step establishes a unique identification for the student within the Academic Bank of Credits system.

### Step 4: Accumulate Credits

With the APAAR/ABC ID in place, students can now proceed to accumulate credits as they successfully complete courses. The credits are automatically logged into their ABC accounts, creating a digital record of their academic achievements.

To monitor and track their progress, students can conveniently check their accumulated credits by logging into the official ABC website at [abc.gov.in](http://abc.gov.in).

This user-friendly interface provides students with a comprehensive overview of their academic journey, fostering transparency and encouraging active engagement with the ABC system.

Beyond traditional courses, PU introduces short-term skill development 4-credit Courses. Completion of these courses not only enhances students' skill sets but also awards them with specific credits. NEP-2020 advocates for a multidisciplinary approach to learning, and PU has embraced this by allowing students to choose courses from various disciplines and institutions.

This integration of multiple disciplines provides students with a holistic and well-rounded education, preparing them for a dynamic and interconnected world. Significant autonomy is granted to students, empowering them to design their academic journey. They can choose courses based on their interests and career goals, fostering a sense of ownership and responsibility for their learning.

In summary, the scenario envisions a dynamic educational environment at Progressive University, aligning with the fundamental principles of NEP-2020. The Academic Bank of Credits provides students with a flexible, personalized, and lifelong learning experience, emphasizing the importance of continuous skill development and multidisciplinary knowledge acquisition.
